

Activity 1: Age and house number

Try this: you will probably need a calculator!

1. Write down your house number.
2. Double it.
3. Add the number of days in a week.
4. Multiply by 50.
5. Add your age.
6. Subtract the number of days in a year (not a leap year).
7. Add 15.

The answer is your house number and your age!

Can you explain why this works?
