

## Activity 19: Presenting an argument

- » Choose a topic.
- » Think about the arguments for and against the statement.
- » Think about any questions that you might have about the statement. You do not have to have the answer to these questions.
- » Use the outline below to arrange your arguments and questions.
- » One member of your pair should choose to argue in favour of the statement and one should choose to argue against it.
- » You have one minute each to present your case.
- » Alternatively you can present your findings in writing.
